- Gravy** (Contains Dairy; - May contain Soy & Egg)
- Creme Brulee Cheesecake** (Contains Soy, Dairy & Egg)

**Strip's has proudly served over 100 award-winning gluten-free (GF) meals DAILY since 2016 so it's an incredibly important segment of our business - and we are constantly improving to be even better!*

To reduce the chance of cross-contamination we are one of the very few restaurants to utilize a dedicated GF Fryer Oil Filtration System in each of our kitchens in addition to dedicated GF fryers. We require our employees to change their gloves before preparing your sandwich with our GF/Keto bun instead of giving the bun to you in a bag (bagged buns provide a false sense of security - how is the rest of your meal safe if they can't safely open a bag?!)

Nothing cooked on our flame grills has any common allergens or gluten. We do not allow our staff to store their personal food in our coolers or cook it in our fryers and grills to eliminate another source of possible cross contamination. Even restaurants claiming to be 100% gluten free run the risk of someone cooking a frozen burrito from home in their fryers if they aren't paying attention to employee food from home. (This happened the first month we started offering gluten free options in 2016!)

We use a Nima device to detect gluten when testing new products. Our kitchen computer system shows all GF items in bold color - virtually eliminating errors. We NEVER use our gluten-free breading on food that normally has gluten breading to eliminate confusion. And while I don't claim to have relatives with celiac, more importantly I often have a celiac employee WORKING in my kitchens.

If you are not accustomed to eating fried food regularly and then eat a large quantity of fried items at Strip's you might get sick. Please take that into consideration when you order. We have many gluten free options not fried.

While no restaurant making items from scratch can guarantee you will never be served an allergen, we love being "Completely Different . . . and Absolutely Better!" with everything we do. I certainly appreciate your feedback and support ♥♥♥♥♥
